ABBYY Vantage 2.5 release notes

About ABBYY Vantage

ABBYY Vantage is a comprehensive intelligent document processing (IDP) platform that provides AI-powered cognitive services, as well as pre-trained and trainable skills that can 'understand' business documents and extract actionable data and insights.

ABBYY Vantage is a no-code / low-code platform that makes today's digital worker and processes smarter and empowers the new citizen developer to accelerate digital transformation initiatives and expand automation to new processes in a fast and simple way, making an immediate impact on business results and customer experience.

To facilitate the exchange and use of Vantage skills and other technology assets, including connectors, demo apps, and custom activities, ABBYY offers a Marketplace to its customers, partners, and the wider public. The ABBYY Marketplace can be accessed at https://markeplace.abbyy.com. The ABBYY Marketplace is designed to share knowledge and solutions, as well as increase re-use to accelerate implementation and reduce effort. Assets acquired from the ABBYY Marketplace can be used in ABBYY Vantage via the Vantage Skill Catalog.

About the release

This is a minor Vantage release that introduces new features and bug fixes.

The Bug fixes section contains a detailed list of issues that have been fixed in this release.

This release has some known limitations and issues. Updating existing copies of built-in skills and converting them into derived skills that use the latest version of the Technology Core is temporarily disabled. But you can create new skills that will use Technology Core v. 2.0 straight away. A detailed description and other limitations can be found in the Limitations and known issues section.

Bug fixes

In Vantage 2.5, the following bugs have been fixed:

Zendesk Ticket #	Description	Affects
584073, 579590, 583513, 583445, 582005, 582785	After adding columns to table fields or removing columns from them, new rows either could not be added, or disappeared before reappearing again.	Document skills
579750	Modifying a value in the Line Items table for a derived skill with over 100 data catalogs attached caused the page to go blank.	Document skills
565123	ABBYY Vantage could not process some large documents.	Document skills
580804	Processing with a Document Splitter skill failed for some documents after upgrading to version 2.4.	Document Splitter skill
580526	An error.json file created in the SFTP output folder was in a different format than the error.json file returned by the	JSON output

Zendesk Ticket #	Description	Affects
	API call that resulted in an error.	
580132	For some PDF files with a text layer, the values of some fields were duplicated when the document was imported to Vantage.	OCR service
581509, 579559	Some activities within a Process skill incremented the Licensed Skill counter, even though no licensed skills were used in that Process skill workflow.	Process skill, licensing
485816	A detailed description of how company detection works in Vantage was added. For more information about Vendors/BUs detection algorithm, see: • https://vantage-eu.abbyy.com/help/english/AdvancedDesigner/?topic=ad_companydetectionalgorithm if you are in Western Europe • https://vantage-us.abbyy.com/help/english/AdvancedDesigner/?topic=ad_companydetectionalgorithm if you are in North America • https://vantage-au.abbyy.com/help/english/AdvancedDesigner/?topic=ad_companydetectionalgorithm if you are in Australia	Vantage documentation

Limitations and known issues

In this release, there are the following new limitations and known issues that will be addressed in future releases:

Document and Classification skills

- Updating existing copies of built-in skills and converting them into derived skills that use the latest version of the Technology Core is temporarily disabled. Instead, you can create a derived skill from the corresponding built-in skill that uses the latest version of the Technology Core. Also, since updating of copies is disabled in this version, you can create new skills that will use Technology Core v. 2.0 straight away. This may be necessary in cases when you want to add a new Document skill to a Process skill that contains other Document skills based on Technology Core v. 2.0.
- Updating existing copies of built-in skills that use Technology Core v. 1.0 is temporarily disabled. Updating copies of built-in skills to the latest version of the Technology Core will become available once we add a feature to update copies of default skills in future releases.
- If your skill has a rule that enters in a value into a table row, it may add a new empty row to the table containing only that value. This issue also occurs in skills derived from the Invoice US built-in skill.

For a full list of limitations and known issues, see:
