ABBYY Vantage 2.7.1 Release Notes

About ABBYY Vantage

ABBYY Vantage is a comprehensive intelligent document processing (IDP) platform that provides AI-powered cognitive services, as well as pre-trained and trainable skills that can ‘understand’ business documents and extract actionable data and insights.

ABBYY Vantage is a no-code / low-code platform that makes today’s digital worker and processes smarter and empowers the new citizen developer to accelerate digital transformation initiatives and expand automation to new processes in a fast and simple way, making an immediate impact on business results and customer experience.

To facilitate the exchange and use of Vantage skills and other technology assets, including connectors, demo apps, and custom activities, ABBYY offers a Marketplace to its customers, partners, and the wider public. The ABBYY Marketplace can be accessed at https://abbyy.com/marketplace/. The ABBYY Marketplace is designed to share knowledge and solutions, as well as increase re-use to accelerate implementation and reduce effort. Assets acquired from the ABBYY Marketplace can be used in ABBYY Vantage via the Vantage Skill Catalog.

About this Release

In this Vantage release, we have resolved several functionality issues.

The Bug Fixes section contains a description of the issues that have been fixed in this release.

Bug Fixes

Vantage 2.7.1 delivers targeted improvements to enhance stability, reliability, and overall user experience. This release addresses a range of customer-reported issues across key areas of the platform, including OCR, Manual Review, Document Skills, and authentication.

The updates in this release support smoother document processing, more accurate data capture, and improved system responsiveness.

In Vantage Release 2.7.1, we've addressed the following issues:

Data Catalog

- ✓ Previously, the search popup would pop up every time you changed a cell value, that's been fixed. Now, the popup only appears when you click the magnifier icon, and it won't show up if the Data Catalog isn't connected. No more unexpected interruptions in the workflow. (609437)

Document Skill

- ✓ When using Microsoft Pinyin keyboard, symbols are now inserted into the expected position. (607171)
- ✓ We've improved extraction accuracy for low quality scans which previously caused redundant digits, spaces, and inaccurate characters. (604395)

Manual Review

- ✓ We've fixed an issue causing blank document screens during manual review. (611592)
- ✓ When using IFrame display mode, the Send to Stage button is now visible on the Manual Review page. (607148)
- ✓ Document rendering in the Manual Review stage has been improved, with all page content displaying correctly – eliminating blank screen issues. (609653)

OCR

- ✓ Detection and recognition of QR codes has been enhanced. (611282)
- ✓ During extraction of alphanumeric values, upper case and lower case characters are now preserved as expected. (603909)
- ✓ All documents, including those with digital signatures, are processed as expected. (615169)
- ✓ The Job Extraction error that was causing transaction failures during file processing has been fixed. Now, files move through Document Skill smoothly, without any issues. (608670)
- ✓ Thai characters are now recognized accurately, and superscript and subscript characters are detected during processing. (609819)

Process Skills

- ✓ We’ve updated PDF version support to resolve issues impacting PDF import and export. (606440, 602117, 608995, 596053)

Transaction

- ✓ We've addressed a bug that caused a "500 error" for some customers when clicking the Help link in Vantage. Users can now seamlessly access the documentation, as it will load directly without requiring extra authentication steps. (609174)
