Introduction

About this document

This document describes the changes made in

- ABBYY Timeline 6.2.0
- The update applied to all regions: EU, US, JP, AU

About ABBYY Timeline

ABBYY Timeline is a process intelligence platform comprising over twenty-five process analysis tools. More than a mere process tracker, ABBYY Timeline will monitor all events within your company in real time and build a detailed map of each process, all while maintaining the flow of your business.

ABBYY Timeline accepts event data from any number of systems of record and automatically reconstructs the underlying business process logic behind the data. A variety of pre-built analyses are ready to quantify your process performance, identify your process execution issues and perform root cause analysis. The ABBYY Timeline platform also supports operational monitoring through its continuous assessment of new event data to determine if any adverse conditions occur and can immediately notify you or other business operations personnel so you can act.

Using advanced algorithms, ABBYY Timeline extracts and reads the time stamps used to record specific events along your processes. The software then visually models these time stamps in such a way that you can instantly identify deviations from an ideal process flow – to find the root cause of a problem that may be costing your business money.

ABBYY Timeline is aimed for use by anyone involved in business process improvements of any type of scale or nature.

Improvements

Time in Queue Reporting

New workflow metrics track start and end timestamps for every workflow queue, with visibility into both the total number of items and their average time in queue.

PostgreSQL 16 Upgrade

Upgraded to PostgreSQL 16 to modernize the platform and support improved scalability and performance.

Next.js 15.4.8 Upgrade

Improved the security and reliability of Timeline by upgrading to Next.js 15.4.8, which includes the latest security fixes.

Fixes

Repository Creation Messaging

Corrected an issue where an incorrect message was shown during repository creation, ensuring accurate user feedback.

Technical Support

Should you have any questions regarding the use of ABBYY Timeline, please submit a request to the ABBYY technical support service on this [page](#).
